EMC/EMI

This equipment has been tested and found to comply with the limits for a Class B Digital device, pursuant to part 15 of the FCC rules.
These limits are designed to provide reasonable protection against harmful interference in residential installations. This equipment generates, uses and can radiate radio frequency energy and – if not installed and used in accordance with the instructions – may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception – which can be determined by turning the equipment off and on –, the user is encouraged to try correcting the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and the receiver.
• Connect the equipment to an outlet on a circuit different from the one to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

For the customers in Canada:
This Class B digital apparatus complies with Canadian ICES-003. Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.
Introduction
Congratulations! By buying the TC Electronic Spark pedal, you’ve just done your sounds a huge favor. Whether you use it as an always on-type effect or as a tool to prime your solos and highlight certain parts, Spark is sure to add that certain something to your sound without altering or coloring your tone in any way.
Use it to push amps to their full potential, fatten up the sound of your guitar and make your gear come alive with added grit, punch, compression and musicality. The active EQ controls put you in full command of your tones, allowing you to shape and sculpt sounds providing thundering lows, sparkling highs and mix-cutting mids that guarantee you are heard like never before.
1 - Effect on/off (true bypass)
2 - 1/4 inch mono jack input
3 - 1/4 inch mono jack output
4 - Bass control
5 - Treble control
6 - Gain control
7 - Level control
8 - Voice selector (Fat/Clean/Mid)
9 - Power in (9VDC)
Connecting

**Input jack** – 1/4 inch mono jack input. If you run the pedal on battery, we recommend removing the input jack to preserve battery power when you don’t play.

**Output jack** – 1/4 inch mono jack output for connecting to another pedal or directly into an amp or mixer.

**Power in** – Use a 9 VDC power supply with the following symbol:  
![Power Symbol]
The Controls

BASS & TREBLE
Bass/treble controls. Add bass for more punch or roll off a bit for a tighter sound, especially on big cabinets. Add treble to cut through a dense mix or compensate for signal lost in long cables. For a softer tone, try reducing the treble.

GAIN
Controls the amount of gain. This is a clean booster pedal, but a high gain setting gives a natural break-up as on a cranked amp.

LEVEL
Sets the overall level.
Voice Type selector

Three Voice types are available

- in “Fat” position (up), the low-end frequencies are naturally boosted. This is excellent where the guitar is allowed to take up a great portion of the sonic spectrum.
- “Clean” position (middle), is a total transparent mode. No EQ is applied to the signal.
- in “Mid” position (down) midrange frequencies are emphasized. It is not only a boost in level that will make your licks stand out. Sometimes a boost in midrange frequencies is exactly what you are looking for more than a change in level.

Changing battery – Unscrew the thumb-screw on the back of the pedal and detach the back-plate. Unmount the old battery and attach the new battery to the battery clip making sure the polarity is correct. Then remount the back-plate. To save battery life, remove the input jack when you don’t play.

⚠️ Batteries must never be heated, taken apart or thrown into fire or water. Only rechargeable batteries can be recharged. Remove the battery when the pedal is not being used for a longer period of time. Dispose batteries according to local laws and regulations.
